

perfectly co-ordinated duo for unknown comfort with biplace flying

**Bix & Passenger - perfectly co-ordinated duo for unknown comfort with biplace flying**

**Bix** – the versatile harness for the tandem pilot:

- ▶ a large seat with a flared front means the pilot automatically finds himself sitting comfortably on take-off with the passenger held firmly between the pilot's legs. This allows better control in turbulent conditions and a more comfortable seating position.
- ▶ the tandem parachute container is located under the legs, allowing extraction from right or left
- ▶ complete with rescue parachute connection line

**Material:** Cordura® 500, light nylon, Camp aluminium karabiners  
**Certification:** DHV with GET-UP system GS-03-246-01  
**Crash test result:** 17.8 negative G, with 17cm internal back protection  
**Weight:** 4.2 kg (without back protection)  
**Size:** L  
**Colours:**

black/grey

**Optional extras:**

17 cm back protection + 1150g

**Passenger** - the uncomplicated harness for the passenger:

- ▶ equipped with: Airbag back protection, rear pocket for glider sack and side pockets made of elastic webbing, accessible by the tandem pilot in flight
- ▶ points for attaching instruments for the tandem pilot
- ▶ adjustable depth to facilitate the passenger attaining a seated position after take-off, or a standing position before landing
- ▶ plastic protection on the lower surface for fast cleaning and an always new and well-groomed impression

**Material:** Cordura® 300, light nylon, Camp aluminium karabiners  
**Certification:** DHV with GET-UP system  
**Crash test result:** 12.5 negative G  
**Weight:** 3.5 kg (with back protection)  
**Size:** unisize with generously adjustable shoulder belts

GET-UP-System

**Colours:**

black/grey

**Optional extras:**

Relax bar + 200g
