

PEAK 2

the light general-purpose harness for fun, bivouac and trekking pilots

Peak 2 - the light general-purpose harness for fun, bivouac and trekking pilots

Using the same seat construction as the VELVET 2 but with the use of light high tech materials such as Cordura, light nylon fabric and an airbag protection, we succeeded in a weight of only 3.6 kg. If you are looking for an easy and space saving harness, which does not compromise safety, handling sensitivity and ruggedness, the PEAK 2 is the right choice for you.

- ▶ equipped with an airbag of the latest generation, which fulfils the new requirements of the DHV and the European certification
- ▶ innovative, automatically filling multi-chamber system, which protects also the top of the back optimally, beginning from the first phases of take off
- ▶ seat plate extension, which loosens automatically and tightens in the take off and landing phases
- ▶ adjustable seat depth
- ▶ roomy back pack with two mounting plates for the safe attachment of two telescopic trekking poles
- ▶ side pockets from high-strength net fabric
- ▶ Carbon seat plate
- ▶ security card at the shoulder strap for a fast first aid access in case of emergency
- ▶ rescue container under the seat
- ▶ new, graceful design

Material: Cordura® 300, light nylon fabric, Camp aluminium karabiners

Weight: 3.6 kg
