

TRANSALP

TRANSALP

the ultra-lightweight mountain harness

Back pocket

Transalp - the ultra-lightweight mountain harness

A light harness with a very compact volume. Ideal for all pilots who would like to combine flying with trekking or rock climbing. It is also very comfortable for long flights complete with central stability adjustment.

- ▶ Aluminium adjustment buckles on the shoulder straps to avoid accidental damage
- ▶ the adjustable seat loops are connected for higher stability in the harness
- ▶ complete with four pulley speed system
- ▶ generous rear pocket from net fabric

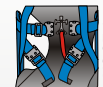

Material: Cordura® 300, trapeze maillon rapide karabiners

Weight: available in two versions:
 1) harness including karabiners, total weight: 0.90 kg
 2) harness including karabiners and integrated "Transalp" rucksack, total weight: 1.95 kg

Certification: DHV with T-LOCK system

Size: unisize

Colours: grey/orange
