

X-OVER 3

X-OVER 3

harness created for competition and cross-country

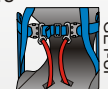

X-Over 3 - harness created for competition and cross-country

This new version of the X-OVER harness presents many of the X-RATED 4 aerodynamic and esthetic features, the inflatable tail in particular. Its elaborate geometry guarantees great passive safety also at full speed and optimum control when flying in turbulence. The X-OVER 3 aims to satisfy the competition pilots' demands and is therefore available in two versions: with a DHV certified 17 cm back protection or with a lighter and smaller 12 cm back protection.

- ▶ parachute container located under the legs, side rescue handle
- ▶ comfortable relax bar
- ▶ secure side pockets for storage
- ▶ adjustable seat depth
- ▶ optionally with 12 cm or 17 cm thick foam back protection

Material: Cordura® 500, neoprene, nylon, Camp aluminium carabiners
Weight: 5.65 kg (without back protection)
System: GET-UP
Sizes: M - L - XL
Colours: black/white/red

Optionals:

Side protection
+ 200g

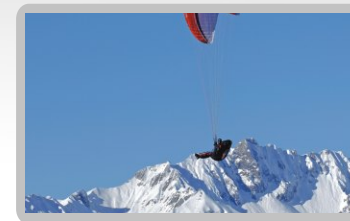

Speed system
+ 100g

Carbon seat plate
- 260g

Instrument holder cockpit
and/or front ballast
+ 500g / + 600g
